

## New Men's Residence Hall

### Northwest Mississippi Community College

Senatobia, MS

Fowler Engineering provided structural engineering services for this 22,000 ft<sup>2</sup> 2-story college residency. A load-bearing masonry structure with long-span composite floor deck, light gauge steel trusses, and shallow concrete was utilized foundations for this project. The building featured dorm rooms, a kitchen, café, laundry room, and educational and social spaces to be shared by the residents.
